Note: The flood line was created by the Department of Environment and Resource Management with input from Brisbane City Council. The flood line was created using aerial flood imagery that was flown over a number of days between the 13th to 15th January and pre-flood aerial imagery. This line was verified against digital elevation models and contours (LiDar). The completeness of the data is dependent on image quality and the ability to identify feature detail. Inaccuracies may exist particularly in the Brisbane CBD area due to high rise buildings, areas of heavy vegetation along the river banks and also low lying flat areas such as near the mouth of the Brisbane River. Feedback and comment on the position of the line is requested from anyone that has information which can be used to refine the line.
