

FLOOD COMMISSION

Dear Members

re ESSENTIAL SERVICES + SUPPLIES POWER SUPPLY

(a) If extensive undergrounding of power not feasible, at least underground power from a source (above highest flood level + 2) substation to pumps for central water supply + sewerage.

(b) stand by generators for hospitals, supermarket fridges be flood proofed.

(c) Investigate Fridge which can keep materials cool, 5°C, for 10 days without power.
(Developed for vaccine storage in 3rd World)

FIRM MANUFACTURING

TRUE ENERGY of Tywyn Gwynedd U.K.

(See New Scientist 8 Jan 2011 page 20)

If viable, invest in further development + possible subsidies for appropriate users of this fridge.

Thanks for your efforts,
Frank Happ
