**Subject:** re: why has this enquiry closed so soon?

Hello,

We are yet another family affected by this catastrophic event and feel this enquiry will be a sham, after all, a government only calls for an enquiry when they know the answer!!! Prove me wrong!!! Why has it closed so early? we have other things to deal with and it should have remained open for longer.

This has been a diabolical cock up from the start, SEQWater was advised in March 2010 to bring the dam level down to around 40%, which is 5 to 8 years water supply WITHOUT rain, this correspondence was published in the newspapers, so they can't deny that they were warned and chose to ignore this very sound advice. This dam was built for flood mitigation NOT Brisbane's water supply and was changed by Peter Beattie, who should have been concentrating on the running of this state instead of dilly dallying with "other" things.

The CEO of SEQWater was no where to be seen during this crisis, I heard he buggered off in a helicopter and was not seen for days, only to come on the TV later to say they were letting water out, TOO LATE IDIOT!!!!!!!!!!

We have lost so much in this flood that can never be replaced by insurance, including hundreds of thousands of dollars value in our homes, of course we will be taking this opportunity to take out a class action against those responsible, ie CEO and Board of SEQ Water, Anna Bligh, Peter Beattie, BCC and anyone else who had a hand in this fiasco, they are all idiots and should get their snouts out of our trough!

As you might ascertain I am VERY angry and nothing you can say will ease this anger until you make those responsible accountable, which you won't do.

Yours truly,  
Laraine Stevenson
