Subject: Re: Reports

Hello Jim,

I am planning to complete my report tonight and to send it immediately to UniQuest for transmittal to Seqwater as a formal document by your deadline of cob Thursday. I doubt that UniQuest will be able to process it in time for your Board Meeting tomorrow, so I will send you the text of my report, as advice, which will be replaced (without change of substance) by the formal UniQuest document.

Regards
Colin

Colin

I am sorry to bother you but I can't raise John at the moment and was wondering when you might be planning on submitting your final report to us. I think you indicated you were very near completion the other day when we spoke on the phone. We have a Board meeting tomorrow and I was hoping I might be able to table your advice at the meeting. Please excuse me if you have already discussed with John.

Also hear the 30 day flood report was released today onto the BCC website. One down!

Regards

Jim

Gentlemen

QFCI

Date: 8/2/12 Jm

Exhibit Number: 1107

I apologise this advice did not come out with the reports last week as expected. However, as discussed last week, and as previously advised by John Tibaldi, we request you confine your review to answering the following questions at this time:

1. The January 2011 Flood Event occurred between 6 January 2011 and 19 January 2011. Was the release of water from Wivenhoe Dam and Somerset Dam during the January 2011 Flood Event in accordance with The Manual of Operational Procedures for Flood Mitigation at Wivenhoe Dam and Somerset Dam (Revision 7)?
2. Based on the information contained in the draft Report, were there any aspects relating to the operation of Wivenhoe Dam and the operation of Somerset Dam during the January 2011 Flood Event **not** in accordance with The Manual of Operational Procedures for Flood Mitigation at Wivenhoe Dam and Somerset Dam (Revision 7)?

There may be other tasks we require help with but at this stage the answers to the above are required ASAP this week. The comments will be included in our submission to the Commission of Inquiry which will be lodged on Friday 11 March 2011. Therefore latest comments should be presented to us no later than by COB Thursday 2011. Email response is fine

Please discuss any technical questions you may have with John Tibaldi on [REDACTED]

Regards

Jim Pruss
